# Set Up Your MC55 Four Slot Ethernet Cradle
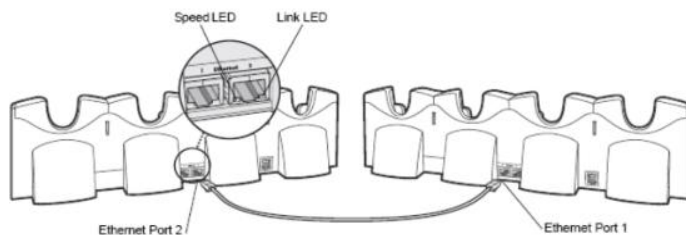

1 Connect power to your 4 Bay cradle.

2 Connect an ethernet cable from ethernet port 1 on the cradle to an open ethernet port on your wall. You may need to check with your IT Department to ensure you have Internet access at that port.
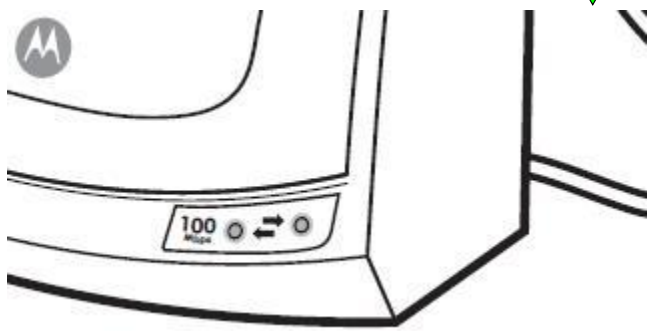

Port 1

Ethernet Port

Ethernet Switch, Router, or Hub Connection

Power Port

Note that Port 2 is for daisychaining cradles. Daisychain up to four Ethernet cradles to connect several cradles to an Ethernet network. Use either a straight or crossover cable.

Speed LED   Link LED

Ethernet Port 2   Ethernet Port 1

3 Note the indicators on the front of your cradle.

One or both of these lights should blink if you have attached the cradle to a live ethernet port.

100 Mbps

4 Verify there is a connection to the Internet by tapping Start > Internet Explorer on your mobile computer.
