Handheld Settings for MC55

Setting up Datawedge3.3 on Handheld

1. **Click on Start > Settings > System > Datawedge**

   a. Select Basic configuration

   b. Select Barcode input.

   c. Select scanner number 1 with check mark to modify

   d. Select 2.Decoders
      Click 1 and Enable All,
      Scroll to 9.More; 5. I20F5; and 2.Length Set Min to 0 and Max to 55.
      Click Back until you reach the screen where it says Barcode input.

      *Do not click the "X" at the bottom right or you will need to redo everything in Datawedge.

   e. Select 3.Basic format
      Set the device to 6.Send TAB key
      Turn off 7.ENTER key.
      Select 0.Back, 0.Exit

   f. Press OK to exit Datawedge.

Setting up Word Completion on Handheld

1. **Click Start > Settings > Personal > Input**

   a. Click on Word Completion at the top right

   b. Uncheck: Suggest words when entering text and Enable Auto Correct

   c. Click Clear Stored Entries, to help clean up space as well

   d. Press OK

Setting up Mobile Tracking App on handheld (if lose configuration on handheld)

1. **Click Start > Application Mobile icon**

   a. Since this is the first time the Mobile App has been set up, you will be asked if you would like to proceed with installation. Click Continue.

   b. Choose http only and choose MC55 handheld

   c. Enter the activation information provided from the customer install sheet. (Note that based on the sales agreement only a set number of mobiles licenses are available)

   d. Click "Register" when you are finished.

   e. On verification of the custom select All Done
